Operational Air Navigation System Performance - Brazil/Europe

This online version presents the initial comparison of Operational Air Navigation System Performance in Brazil and Europe.

It is organised in 2 parts

- Part A - most recent COVID19 related system characteristics in terms of traffic/demand. This part will be updated on a monthly basis.
- Part B - initial comparison report. The initial comparison report describes the operational performance in Brazil and Europe for the years 2016-2019. It is based on a selected subset of the ICAO GANP key performance indicators. It is planned that the rolling update of Part A will successively develop into the next iteration of the comparison report.

Previous reports will be available via this page for download.

For any questions, please do not hesitate to contact one of the authoring organisations. Enjoy the read!
